HEALTH IT, SIMPLIFIED

securityMETRICS®

Our healthcare system is in critical condition; its costs are out of control, and it's failing to keep us healthy. Medical bills are the leading cause of bankruptcy. We spend twice as much per person to pay for a healthcare system whose results rank last of all industrialized nations. Recent health reform legislation seeks to change all of this. A key component of health reform is a push towards ubiquitous electronic health records (EHRs) supported by nationwide health information exchange. Paper systems can never solve these problems! This move toward a highly digitized healthcare environment also carries with it new risks to the confidentiality, integrity, and availability of patient data. Higher quality, lower cost healthcare can evolve only if we incorporate interoperable health information exchange and standardized, secure electronic communication of administrative and clinical transactions.

The Administrative Simplification Subtitle of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) began the rebuilding process by requiring the adoption of government standards for administrative transactions, code sets, identifiers, security, and privacy. The Health Information Technology for Economic and Clinical Health (HITECH) Act, (part of the American Recovery and Reinvestment Act of 2009) made the Office of the National Coordinator for Health Information Technology a part of statutory law and provided financial incentives and support for a roll out of EHR systems and use of electronic clinical information exchanges. In addition, HIPAA requirements for privacy and security were enhanced, and the Secretary of the Department of Health and Human Services (HHS) was directed to undertake "the development of a nationwide health information technology infrastructure that allows for the electronic use and exchange of information and that ensures that each patient's health information is secure and protected." HHS also promulgated regulations requiring the adoption of updated versions of the transaction standards and the use of ICD-10 coding.

Then Congress enacted healthcare reform legislation in the form of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (combined, now referred to as PPACA or ACA), which pushes the healthcare industry even further in the direction of expanded use of health information technology. HHS is producing many more regulations regarding privacy, security, electronic health records, and operating rules to add value to the administrative transaction and code set standards. Just when we thought that the HIPAA changes had settled in, HIPAA changes are off and running again! These developments will affect most aspects of healthcare and everyone connected professionally with healthcare must understand these changes and what will be required in order both to benefit from and to comply with these new legal requirements.

All of these developments create substantial compliance challenges for HIPAA covered entities and their business associates and subcontractors. Hospitals, clinical organizations, health plans including health insurance companies, physicians, and all other covered entities must implement, update and train their workforces regarding HIPAA and HITECH generally, as well as institution-specific policies and procedures including corporate compliance programs. Complex requirements regarding data breaches now must be included in the policies and procedures, and in training programs. New challenges relating to accounting for disclosures and anticipated privacy and security audits must be dealt with, even before final regulations provide guidance. Health plans will be at risk for new and significant financial penalties under ACA certification requirements.

The HIPAA Summit will provide the most up-to-date information on the new laws and regulations. Comprehensive presentations by leading regulators from the Centers for Medicare & Medicaid Services, the Office for Civil Rights, and the Office of the National Coordinator for Health Information Technology will provide unique insights. Private sector leaders will add practical advice from their many experiences in implementation. This HIPAA Summit will address privacy and security and data breach changes and challenges and the legal and policy issues implicated, as well as electronic health record adoption issues. It will also cover developments and requirements for transactions, code sets, and operating rules and how they are being implemented. Training sessions for HIPAA privacy and security professionals, as well as those responsible for HIT, EHR, HIE, Operating Rules and/or Data Analytics, who intend to apply for certification are also available.

EXHIBIT AND SPONSORSHIP OPPORTUNITIES

Take advantage of this unique opportunity to expand your reach! The Summit is attended by highly influential and experienced professionals. Sponsorship offers you strategic positioning as an industry leader. For more information call 206-673-4815 or email exhibits@hcconferences.com.

THE FOLLOWING REGISTRATION TERMS AND CONDITIONS APPLY

REGARDING INTERNET REGISTRATIONS

1. Individuals or groups may register for Internet access. Organizations may register for group access without presenting specific registrant names. In such instances the registering organization will be presented a series of user names and passwords to distribute to participants.

2. Each registrant will receive a user name and password for access. Registrants will be able to change their user names and passwords and manage their accounts.

3. Internet registrants will enjoy six (6) months access from date of issuance of user name and password.

4. Only one user (per user name and password) may view or access archived conference. It is not permissible to share user name and password with third parties. Should Internet registrants choose to access post conference content via Flash Drive, this individual use limitation applies. It is not permissible to share alternative media with third parties.

5. User name and password use will be monitored to assure compliance.

6. Each Internet registration is subject to a "bandwidth" or capacity use cap of 5 gb per user per month. When this capacity use cap is hit, the registration lapses. Said registration will be again made available at the start of the next month so long as the registration period has not lapsed and is subject to the same capacity cap.

7. For online registrants there will be no refunds for cancellations. Please call the Conference Office at 800-503-7417 or 206-452-5624 for further information.

REGARDING ONSITE REGISTRATION, CANCELLATIONS AND SUBSTITUTIONS

1. For onsite group registrations, full registration and credit card information is required for each registrant. List all members of groups registering concurrently on fax or scanned cover sheet.

2. For onsite registrants there will be no refunds for "no-shows" or for cancellations. You may send a substitute or switch to the online option. Please call the Conference Office at 800-503-7417 or 206-452-5624 for further information.

However, onsite attendees can request a Certifcate of Attendance which they can file with appropriate entities for credit, and online attendees can request an Online Certificate of Attendance on which they can certify the number of hours they watched and can file with appropriate entities for credit.

CANCELLATIONS/SUBSTITUTIONS

No refunds will be given for "no-shows" or for cancellations of either online or onsite registrations. You may send a substitute or transfer your onsite registration to an online registration. For more information, please call the Conference Office at 800-503-7417 or 206-452-5624.

INTELLECTUAL PROPERTY POLICY

Unauthorized sharing of Summit content via Internet access through the sharing of user names and passwords or via alternative media (Flash Drive) through the sharing of said media is restricted by law and may subject the copyright infringer to substantial civil damages. The Summit aggressively pursues copyright infringers. If a registrant needs the ability to share Summit content within his or her organization, multiple Summit registrations are available at discounted rates.

The Summit will pay a reward for information regarding unauthorized sharing of Summit content. The reward will be one quarter (25%) of any recovery resulting from a copyright infringement (less legal fees and other expenses related to the recovery) up to a maximum reward payment of $25,000. The payment will be made to the individual or individuals who in the opinion of our legal counsel first provided the factual information, which was necessary for the recovery. If you have knowledge regarding the unauthorized Summit content sharing, contact the Summit registration office.

REGISTRATION BINDING AGREEMENT

Registration (whether online or by this form) constitutes a contract and all of these terms and conditions are binding on the parties. In particular, these terms and conditions shall apply in the case of any credit/debit card dispute.

GENERAL TERMS AND CONDITIONS

Program subject to cancellation or change. If the program is cancelled the only liability of the Summit will be to refund the registration fee paid. The Summit shall have no liability regarding travel or other costs. Registration form submitted via fax, mail, email or online constitutes binding agreement between the parties.
