HIPAA SUMMIT OVERVIEW

Our healthcare system is in critical condition; its costs are out of control, and it's failing to keep us healthy. We spend twice as much on healthcare per person as the next highest cost country, yet American healthcare is falling short on basic dimensions of quality, outcomes, costs, and equity.

As described in the 2012 Institute of Medicine (IOM) report, *Best Care at Lower Cost: The Path to Continuously Learning Health Care in America*, achieving their vision of continuously learning health care will depend on broad action by the complex network of individuals and organizations that make up the current health care system, including you. We must work together to achieve two overarching imperatives: to manage the health care system's ever-increasing complexity, and to curb ever-escalating costs. These goals are dependent on the ubiquitous implementation of electronic health records (EHRs), supported by health information exchanges, to enable the nationwide interoperability of health information to evolve. This fluid exchange of patient data also requires careful management of the inherent risks to the confidentiality, integrity, and availability of patient health information.

The legal footings for this evolution started with the Administrative Simplification Subtitle of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) which required the adoption and implementation of standards for administrative transactions, code sets, identifiers, security, and privacy. The Health Information Technology for Economic and Clinical Health (HITECH) Act, (part of the American Recovery and Reinvestment Act of 2009) made the Office of the National Coordinator for Health Information Technology (ONC) a part of statutory law and provided financial incentives and support for a roll out of EHR systems and use of electronic clinical information exchanges. In addition, HIPAA requirements for privacy and security were enhanced, and the Secretary of the Department of Health and Human Services (HHS) was directed to undertake "the development of a nationwide health information technology infrastructure that allows for the electronic use and exchange of information and that ensures that each patient's health information is secure and protected." HHS also promulgated regulations requiring the adoption of updated versions of the transaction standards and the use of ICD-10 coding.

Then Congress enacted the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010. Together, this Affordable Care Act (ACA), also known as "Obamacare," pushed the healthcare industry even further in the direction of expanded use of health information technology. In 2013 HHS published what is known as the Omnibus HIPAA final rule with modifications to the HIPAA Privacy, Security, Enforcement, and Breach Notification Rules as required by the HITECH Act and by the Genetic Information Non-discrimination Act of 2008 (GINA); and to make certain other modifications to the HIPAA rules to improve their workability and effectiveness and to increase flexibility for and decrease burden on regulated entities. These developments affect most aspects of healthcare, and everyone connected professionally with healthcare must understand these changes and what will be required in order both to benefit from and to comply with these new legal requirements. Although EHRs have been implemented by most hospitals and office-based physicians, new requirements for their 'meaningful use' and new demands for uses of the 'big data' that these implementations produce, face significant resistance at all levels, financial, clinical, and political.

All of these developments create substantial compliance challenges for HIPAA covered entities and their business associates and subcontractors, which are now directly covered by HIPAA. Hospitals, clinical organizations, health plans including health insurance companies, physicians, and all other covered entities must implement, update and train their workforces regarding the HIPAA, HITECH, and Omnibus rules generally, as well as institution-specific policies and procedures including corporate compliance programs. Complex requirements regarding data breaches now must be included in the policies and procedures, and in training programs. Health plans will be at risk for new and significant financial penalties under ACA certification requirements. Outsourcing of healthcare IT is complicated by new requirements for agreements and compliance by contractors.

The HIPAA Summit will provide the most up-to-date information on the new laws and regulations. Comprehensive presentations by leading regulators from the Centers for Medicare & Medicaid Services, the Office for Civil Rights, and the Office of the National Coordinator for Health Information Technology will provide unique insights. Private sector leaders will add practical advice from their many experiences in implementation. This HIPAA Summit will address privacy, security, data breach changes and challenges, and the legal and policy issues implicated, as well as electronic health record adoption issues. It will also cover developments and requirements for transactions, code sets, and operating rules and how they are being implemented. Training sessions for HIPAA privacy and security professionals, as well as those responsible for HIT, EHR, HIE, Operating Rules and/or Data Analytics, who intend to apply for certification are also available.

Please join us as we work together to bring the IOM vision into reality.

LEARNING OBJECTIVES

- Understand the basics of HIPAA, HITECH, and ACA laws and regulations, and the effect of healthcare reform on health information exchange.
- Obtain up-to-date information about recent changes to the HIPAA regulations.
- Update covered entities and business associates regarding HIPAA requirements.
- Learn what HIT contractors and subcontractors must do to become compliant.
- Outline the next generation of privacy and security compliance strategies, and how these affect electronic health record adoption and interoperability.
- Equip healthcare organizations with the knowledge and practical applications to achieve "audit readiness."
- Learn security breach analysis and notification strategies, and understand encryption.
- Offer insights into HIPAA privacy and security compliance best practices.
- Understand the operational efficiency opportunities for providers and health plans supported by the operating rules.
- Analyze industry implementation of ICD-10 and operating rules, and articulate strategies for compliance.
- Learn about the operations efficiency opportunities for providers and health plans supported by the operating rules.
- Understand the latest Medicare and Medicaid program incentives for meaningful use of electronic health records, and the role of regional extension centers.
- Gain expertise in the evaluation, selection and adoption of electronic health record systems.
- Anticipate operational issues and learn best practices in electronic health record implementations.
- Prepare attendees for professional HIPAA privacy and security certification examinations.
- Prepare attendees for professional HIT, EHR, HIE and Operating Rules certification examinations.

THE FOLLOWING REGISTRATION TERMS AND CONDITIONS APPLY

REGARDING WEBCAST REGISTRATIONS

1. Individuals or groups may register for Internet access. Organizations may register for group access without presenting specific registrant names. In such instances the registering organization will be presented a series of user names and passwords to distribute to participants.
2. Each registrant will receive a user name and password for access. Registrants will be able to change their user names and passwords and manage their accounts.
3. Internet registrants will enjoy six (6) months access from date of issuance of user name and password.
4. Only one user (per user name and password) may view or access archived conference. It is not permissible to share user name and password with third parties. Should Internet registrants choose to access post conference content via Flash Drive, this individual use limitation applies. It is not permissible to share alternative media with third parties.
5. User name and password use will be monitored to assure compliance.
6. Each Internet registration is subject to a "bandwidth" or capacity use cap of 5 gb per user per month. When this capacity use cap is hit, the registration lapses. Said registration will be again made available at the start of the next month so long as the registration period has not lapsed and is subject to the same capacity cap.
7. For Webcast registrants there will be no refunds for cancellations. Please call the Conference Office at 800-503-7417 or 206-452-5624 for further information.

REGARDING ONSITE REGISTRATION, CANCELLATIONS AND SUBSTITUTIONS

1. For onsite group registrations, full registration and credit card information is required for each registrant. List all members of groups registering concurrently on fax or scanned cover sheet.
2. For onsite registrants there will be no refunds for "no-shows" or for cancellations. You may send a substitute or switch to the Webcast option. Please call the Conference Office at 800-503-7417 or 206-452-5624 for further information.
