HIPAA SUMMIT OVERVIEW

Our healthcare system is in critical condition; its costs are out of control, and it's failing to keep us healthy. We spend twice as much on healthcare per person as the next highest cost country, yet American healthcare is falling short on basic dimensions of quality, outcomes, costs, and equity.

As described in the 2012 Institute of Medicine (IOM) report, *Best Care at Lower Cost: The Path to Continuously Learning Health Care in America*, achieving their vision of continuously learning health care will depend on broad action by the complex network of individuals and organizations that make up the current health care system, including you. We must work together to achieve two overarching imperatives: to manage the health care system's ever-increasing complexity, and to curb ever-escalating costs. These goals are dependent on the ubiquitous implementation of electronic health records (EHRs), supported by health information exchanges, to enable the nationwide interoperability of health information to evolve. This fluid exchange of patient data also requires careful management of the inherent risks to the confidentiality, integrity, and availability of patient health information.

The legal footings for this evolution started with the Administrative Simplification Subtitle of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) which required the adoption and implementation of standards for administrative transactions, code sets, identifiers, security, and privacy. The Health Information Technology for Economic and Clinical Health (HITECH) Act, (part of the American Recovery and Reinvestment Act of 2009) made the Office of the National Coordinator for Health Information Technology (ONC) a part of statutory law and provided financial incentives and support for a roll out of EHR systems and use of electronic clinical information exchanges. In addition, HIPAA requirements for privacy and security were enhanced, and the Secretary of the Department of Health and Human Services (HHS) was directed to undertake "the development of a nationwide health information technology infrastructure that allows for the electronic use and exchange of information and that ensures that each patient's health information is secure and protected."

Then Congress enacted the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010. Together, this Affordable Care Act (ACA), also known as "Obamacare," pushed the healthcare industry even further in the direction of expanded use of health information technology. In 2013 HHS published the Omnibus HIPAA final rule with modifications to the HIPAA Privacy, Security, Enforcement, and Breach Notification Rules as required by the HITECH Act and by the Genetic Information Nondiscrimination Act of 2008 (GINA); and to make certain other modifications to the HIPAA rules to improve their workability and effectiveness and to increase flexibility for and decrease burden on regulated entities.

Then last year the 21st Century Cures Act was passed with significant new enhancements of HIPAA requirements and enforcement focusing on research, drugs, and interoperability. All of these developments create substantial compliance challenges for HIPAA covered entities and their business associates and subcontractors, which are now directly covered by HIPAA. All must implement, update and train their workforces regarding all the HIPAA, HITECH, and Omnibus rules generally, as well as institution specific policies and procedures including corporate compliance programs. Complex requirements regarding data breaches must be included in the policies and procedures, and in training programs. Health plans are at risk for significant financial penalties under ACA certification requirements. Outsourcing of healthcare IT is complicated by requirements for agreements and compliance by contractors. New regulations to be issued under the Cures Act will require revisions and training on all of the above.

Privacy and security breaches in the health care sector have skyrocketed and now the ransomware threat looms large in health care as cybercrime goes mainstream. Securing information systems that are the foundation of health care enterprises from outside forces that present with a far more complex environment making the need for effective information security of information systems a larger business imperative in order to meet a 21st century threat. The key to a successful security program requires an understanding of cyber threats, strategies for detection and avoidance, an integrated and multifaceted approach across every organization that handles health information, and an appreciation for the real risks to the business of healthcare. HIPAA enforcement activity continues to increase dramatically emphasizing the need for deeper understanding and more effective compliance efforts across the board in healthcare.

The HIPAA Summit will provide the most up-to-date information on the new laws and regulations. Comprehensive presentations by leading regulators from the Centers for Medicare & Medicaid Services, the Office for Civil Rights, the Office of the National Coordinator for Health Information Technology, the National Institute for Standards and Technology, and the Federal Trade Commission will provide unique insights. Private sector leaders will add practical advice from their many experiences in implementation. This HIPAA Summit will address privacy, security, cybersecurity data breach changes and challenges, and the legal and policy issues implicated, as well as electronic health record adoption issues. It will also cover developments and requirements for transactions, code sets, and operating rules and how they are being implemented. Training sessions for HIPAA privacy and security professionals, as well as those responsible for HIT, EHR, HIE, Operating Rules and/or Data Analytics, who intend to apply for certification are also available.

Please join us as we work together to bring the IOM vision into reality.

LEARNING OBJECTIVES

- Understand the basics of HIPAA, HITECH, ACA, and Cures laws and regulations, and the effect of healthcare reform on health information exchange.
- Obtain up-to-date information about recent changes to the HIPAA regulations.
- Update covered entities and business associates regarding HIPAA requirements.
- Learn what HIT contractors and subcontractors must do to become compliant.
- Outline the next generation of privacy and security compliance strategies, and how these affect electronic health record adoption and interoperability.
- Provide information on what you need to know now about the OCR HIPAA program and tools you can use to prepare.
- Equip healthcare organizations with the knowledge and practical applications to achieve "audit readiness."
- Learn security breach analysis and notification strategies, and understand encryption.
- Offer insights into HIPAA privacy and security compliance best practices.
- Understand the operational efficiency opportunities for providers and health plans supported by the operating rules.
- Analyze industry implementation of ICD-10 and operating rules, and articulate strategies for compliance.
- Learn about the operations efficiency opportunities for providers and health plans supported by the operating rules.
- Gain expertise in the evaluation, selection, certification and adoption of electronic health record systems.
- Anticipate operational issues and learn best practices in electronic health record implementations.
- Explain the current cybersecurity landscape in healthcare, including recent and emerging trends.
- Identify the risks posed to provider organizations by cyberattacks, and offer strategies for mitigating that risk.
- Prepare attendees for professional HIPAA privacy and security certification examinations.
- Prepare attendees for professional HIT, EHR, HIE and Operating Rules certification examinations.

THE FOLLOWING REGISTRATION TERMS AND CONDITIONS APPLY

REGARDING INTERNET REGISTRATIONS

1. Individuals or groups may register for Internet access. Organizations may register for group access without presenting specific registrant names. In such instances the registering organization will be presented a series of user names and passwords to distribute to participants.
2. Each registrant will receive a user name and password for access. Registrants will be able to change their user names and passwords and manage their accounts.
3. Internet registrants will enjoy six (6) months access from date of issuance of user name and password.
4. Only one user (per user name and password) may view or access archived conference. It is not permissible to share user name and password with third parties. Should Internet registrants choose to access post conference content via Flash Drive, this individual use limitation applies. It is not permissible to share alternative media with third parties.
5. User name and password use will be monitored to assure compliance.
6. Each Internet registration is subject to a "bandwidth" or capacity use cap of 5 gb per user per month. When this capacity use cap is hit, the registration lapses. Said registration will be again made available at the start of the next month so long as the registration period has not lapsed and is subject to the same capacity cap.
7. For Webcast registrants there will be no refunds for cancellations. Please call the Conference Office at 800-503-7417 or 206-452-5624 for further information.

REGARDING ONSITE REGISTRATION, CANCELLATIONS AND SUBSTITUTIONS

1. For onsite group registrations, full registration and credit card information is required for each registrant. List all members of groups registering concurrently on fax or scanned cover sheet.
2. For onsite registrants there will be no refunds for "no-shows" or for cancellations. You may send a substitute or switch to the Webcast option. Please call the Conference Office at 800-503-7417 or 206-452-5624 for further information.

METHOD OF PAYMENT FOR TUITION

Make payment to Health Care Conference Administrators LLC by check, MasterCard, Visa or American Express. Credit card charges will be listed on your statement as payment to HealthCare (HC) Conf LLC. Checks or money orders should be made payable to Health Care Conference Administrators LLC. A \$30 fee will be charged on any returned checks.

REGISTRATION OPTIONS

Registration may be made online or via mail, fax or scan.

You may register through either of the following:

- Online at www.HIPAAsummit.com.
 - Fax/Mail/Email using this printed registration form. Mail the completed form with payment to the Conference registrar at 12330 NE 8th Street, Suite 101, Bellevue, WA 98005-3187, or fax the completed form to 206-319-5303, or scan and email the completed form to registration@hccconferences.com. Checks or money orders should be made payable to Health Care Conference Administrators LLC.
- The following credit cards are accepted: American Express, Visa or MasterCard. Credit card charges will be listed on your statement as payment to HealthCare (HC) Conf LLC. For registrants awaiting company check or money order, a credit card number must be given to hold registration. If payment is not received by seven days prior to the Summit, credit card payment will be processed.

TAX DEDUCTIBILITY

Expenses of training including tuition, travel, lodging and meals, incurred to maintain or improve skills in your profession may be tax deductible. Consult your tax advisor. Federal Tax ID: 91-1892021.

CANCELLATIONS/SUBSTITUTIONS

No refunds will be given for "no-shows" or for cancellations of either webcast or onsite registrations. You may send a substitute or transfer your onsite registration to a webcast registration. For more information, please call the Conference Office at 800-503-7417 or 206-452-5624.

INTELLECTUAL PROPERTY POLICY

Unauthorized sharing of Summit content via Internet access through the sharing of user names and passwords or via alternative media (Flash Drive) through the sharing of said media is restricted by law and may subject the copyright infringer to substantial civil damages. The Summit aggressively pursues copyright infringers. If a registrant needs the ability to share Summit content within his or her organization, multiple Summit registrations are available at discounted rates.

The Summit will pay a reward for information regarding unauthorized sharing of Summit content. The reward will be one quarter (25%) of any recovery resulting from a copyright infringement (less legal fees and other expenses related to the recovery) up to a maximum reward payment of \$25,000. The payment will be made to the individual or individuals who in the opinion of our legal counsel first provided the factual information, which was necessary for the recovery. If you have knowledge regarding the unauthorized Summit content sharing, contact the Summit registration office.
