**Overview:**

Healthcare privacy and data security remain one of the major policy and operations issues in American healthcare. Current health information technology initiatives raise new and complex healthcare privacy and security issues. HIPAA Compliance is not only complex, but also extremely costly as healthcare moves to electronic data interchange and the Internet and beyond to a variety of new health information technology initiatives. The HIPAA Summit conference series provides a road map to understanding the complex requirements of federal and state law and illuminates strategies for compliance.

The Summit will provide the most up-to-date and sophisticated information on the status and construction of the HIPAA regulations through the presentations of the leading HIPAA regulators from the Center for Medicare and Medicaid Services and the Office for Civil Rights. The Summit will focus on training HIPAA privacy and security professionals for professional certification.

**Learning Objectives:**

- To discuss a basic background to the HIPAA law and regulations;
- To provide HIPAA privacy and security training to prepare attendees for professional certification examinations;
- To offer an overview and update of HIPAA transactions, code sets and identifiers for HIPAA privacy and security professionals;
- To outline the next generation of HIPAA privacy and security compliance strategies;
- To describe prominent multi-institutional and/or regional approaches to HIPAA compliance;
- To assess the applicability of HIPAA to electronic health records (EHRs) and health information technology (HIT).

**SPECIAL HIPAA Summit  
HIPAA Certification  
Examination Package Price  
— SAVE \$200**

Attend the HIPAA Summit Special Edition Healthcare Privacy and Security Training, December 12 - 14, 2007 and take one HIPAA Academy Professional Certification Examination (CHP, CHSS™ AND CHA™) Online for the following package prices:

Through Friday, October 12, 2007*	\$1,390
After October 12, 2007 through Friday, November 9, 2007**	\$1,590

## CISSP AND RELATED EXAMINATIONS

### 8:00 am Registration for Certified Information Systems Security Professional (CISSP) and Related Examinations

### 9:00 am Certified Information Systems Security Professional (CISSP) and Related Examinations

### 3:00 pm Examination Completion

## OTHER PROFESSIONAL CERTIFICATION TRAINING AND/OR CERTIFICATION EXAMINATIONS:

### IAPP Offers CIPP Training and Certification Examinations:

The IAPP is the first organization to publicly establish educational and testing standards for information privacy.

The Certified Information Privacy Professional (CIPP) debuted in 2004 as the foundation course in the essentials of U.S. and international privacy and data protection laws, standards and practices. It also covers the general practice areas of information security, online privacy and data transfers. Successful candidates have completed and passed the CIPP examination and are awarded a three-year certification.

The Certified Information Privacy Professional/Government (CIPP/G) is an extension of the CIPP certification and is designed exclusively for employees of U.S. federal and state government agencies as well as vendors and consultants that serve U.S. government clients. The CIPP/G also is a three-year certification and requires successful completion of both the CIPP and CIPP/G examinations.

You must be an IAPP member in order to take the CIPP examination. Training for the exam is recommended, but not required.

**For more information on CIPP training and certification examinations, go to [www.PrivacyAssociation.org](http://www.PrivacyAssociation.org).**

*At the HIPAA Summit, CIPP Training will be offered on Monday, December 10, 2007. CIPP/G training will be offered on the morning of Tuesday, December 11, 2007. The CIPP, CIPP/C and CIPP/G certification examinations will be offered onsite on the afternoon of Tuesday, December 11, 2007.*

# iapp

international association of privacy professionals

### Health IT Certification Offers Certified Professional in Electronic Health Records (CPEHR) and Certified Professional in Health Information Technology (CPHIT) Training:

HIPAA Summit attendees can receive training in electronic health records and health information technology, and earn recognition of their expertise as a Certified Professional in Electronic Health Records (CPEHR) and a Certified Professional in Health Information Technology (CPHIT) offered by Health IT Certification, [www.HealthITCertification.com](http://www.HealthITCertification.com).

#### Certified Professional in Electronic Health Records (CPEHR)

Planning and managing EHRs for healthcare practice is a challenging, yet rewarding, experience. Professional certification for those who must plan and manage EHRs conveys mastery of the body of knowledge that supports the clinical transformation necessary to achieve EHR benefits.

#### Certified Professional in Health Information Technology (CPHIT)

Many HIT components contribute to efficiencies and effectiveness for healthcare delivery. Professional certification in HIT distinguishes individuals who have demonstrated competence in an increasingly competitive environment of HIT support.

*At the HIPAA Summit, CPEHR/CPHIT training will be offered on Tuesday, December 11, 2007. HIPAA Summit registrants will be able to register for online supplemental CPEHR/CPHIT training and the CPEHR and CPHIT certification examinations online at a discount.*

### CISSP and Related Certification Examinations:

As the first ANSI ISO accredited credential in the field of information security, the Certified Information Systems Security Professional

(CISSP®) certification provides information security professionals with not only an objective measure of competence but a globally recognized standard of achievement. The CISSP credential demonstrates competence in the 10 domains of the (ISC)2 CISSP® CBK®.

The CISSP credential is ideal for mid- and senior-level managers who are working toward or have already attained positions as CISOs, CSOs or Senior Security Engineers.

As a CISSP, you gain access to (ISC)2 services and programs which support and enhance your growth throughout your information security career. These services and programs include: ongoing education, peer networking, forums, events, job postings, industry communications concentrations for proven subject matter expertise, and speaking and volunteer opportunities.

**Register to take the examinations directly with (ISC)2 at [www.ISC2.org](http://www.ISC2.org).**

*At the HIPAA Summit the CISSP and related examinations will be held on the morning of Saturday, September 15, 2007.*
